Report of Independent Registered Public Accounting Firm

To the Participants and Administrator of
Savings Plan of Xerox Corporation and
the Xerographic Division, Rochester Regional Joint Board
on Behalf of Itself and Other Regional Joint Boards

In our opinion, the accompanying statements of assets available for benefits and the related statement of changes in assets available for benefits present fairly, in all material respects, the assets available for benefits of Savings Plan of Xerox Corporation and the Xerographic Division, Rochester Regional Joint Board on Behalf of Itself and Other Regional Joint Boards (the "Plan") at December 31, 2013 and 2012, and the changes in assets available for benefits for the year ended December 31, 2013 in conformity with accounting principles generally accepted in the United States of America. These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

Our audits were conducted for the purpose of forming an opinion on the basic financial statements taken as a whole. The supplemental schedule of assets (held at end of year) is presented for the purpose of additional analysis and is not a required part of the basic financial statements but is supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. The supplemental schedule is the responsibility of the Plan's management. The supplemental schedule has been subjected to the auditing procedures applied in the audits of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

1. Description of the Plan

The following description of the Plan provides only general information. The Plan is subject to the provisions of the Employee Retirement Income Security Act (ERISA) of 1974. Participants should refer to the summary plan description and the plan document for a more complete description of the Plan's provisions.

General

The Plan is a defined contribution plan covering substantially all domestic full and part-time Xerographic Division, Rochester Regional Joint Board on Behalf of Itself and Other Regional Joint Boards (the Union) employees of Xerox Corporation (the Company). Employees are eligible to participate in the Plan immediately upon date of hire.

Administration

The Joint Administrative Board (JAB) is the plan administrator and is responsible for the general administration of the Plan and for carrying out the plan provisions. The trustee of the Plan is State Street Bank and Trust Company. Effective January 1, 2013 the Plan's record keeper changed from Aon Hewitt to Xerox HR Solutions, LLC.

Contributions

Subject to limits imposed by the Internal Revenue Code, eligible employees may contribute to the Plan up to 80% of pay (as defined in the Plan document) through a combination of before-tax and after-tax payroll deductions. Participants who are at least age 50 by the end of the plan year may make an additional catch-up contribution up to \$5,500. Participants direct the investment of their contributions into various investment options offered by the Plan.

As it relates to employees hired prior to January 1, 2006, eligible employees receive a Company match of 50 cents on the dollar up to 6% of pay saved on a before-tax basis, which equals a maximum match of 3% of annual pay up to the Internal Revenue Service (IRS) 401(k) elective deferral limit. To be eligible to receive the matching Company contribution, the employee has to be actively employed on the last business day of the calendar quarter for which the allocation occurs or has retired, died, begun an approved leave, become disabled, or been laid off during the calendar year.

Eligible employees hired on or after January 1, 2006 receive a Company match of 50 cents on the dollar up to 4% of pay saved on a before-tax basis, which equals a maximum match of 2% of annual pay up to the IRS 401(k) elective deferral limit. To be eligible to receive the matching Company contribution, the employee has to be actively employed on the last business day of the calendar quarter for which the allocation occurs or has retired, died, begun an approved leave, become disabled, or been laid off during the calendar year. Eligible employees hired on or after January 1, 2006 also automatically receive a 4% of pay contribution to the Plan.

Vesting of Benefits

Participants are vested immediately in employee and employer contributions and actual earnings thereon.

Payment of Benefits

Upon termination of service, a participant may elect to defer receipt of benefits or receive a lump sum amount equal to the value of his or her account. Participants who are retiree eligible (at least 55 years of age with at least 10 years of service) when service is terminated can receive installments.

Notes to Financial Statements

For a participant who attains age seventy and one-half after December 31, 2011, and has terminated employment, Plan benefits will be distributed by April 1 of the calendar year following the calendar year of attainment of age seventy and one-half, in an amount equal to the Required Minimum Distribution and the remainder of the participant's benefits under the Plan shall be entirely distributed by the last day of the calendar year following the calendar year of attainment of age seventy and one-half. This will not apply to a participant who has elected payment in installments.

Investment Options

Plan participants are able to direct the investment of their plan holdings (employer and employee contributions) into various investment options as offered under the Plan on a daily basis. The investment options consist of 10 Lifecycle Funds, 15 Focused Strategy Funds that include passively and actively managed options, and the Company stock fund.

Participant Loans Receivable

Participants are permitted to borrow from their accounts subject to limitations set forth in the plan document. The loans are generally payable up to 4.5 years, except for loans to secure a private residence which can be payable up to 14.5 years, and bear interest at an interest rate equal to the Citibank commercial prime rate as published in the Wall Street Journal in effect on the 15th day of the month prior to the first day of the quarter to which it is to apply, plus 1% as set on January 1, April 1, July 1, and October 1 by the plan administrator. Principal and interest payments on the loans are re-deposited into the participants' accounts based on their current investment allocation elections. Participants may not have more than five loans outstanding at any one time and the balance of outstanding loans for any one individual cannot exceed \$50,000 or 50% of their vested account balance. Interest rates for loans ranged from 4.25% to 10.5% at December 31, 2013 and 4.25% to 9.5% at December 31, 2012, with loans maturing at various dates through 2026.

Participant Accounts

Each participant account is credited with the participant's contributions, the Company's contributions and an allocation of Plan earnings (losses). Plan earnings (losses) are allocated based on account balances by investment option. Expenses payable by the Plan are charged to participant accounts.

Plan Termination

The Plan was established with the expectation that it will continue indefinitely; however, the Company and the Union reserve the right to amend or terminate the Plan.

2. Summary of Significant Accounting Policies

Basis of Accounting

The accompanying financial statements are prepared on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America.

Benefit Payments

Benefit payments are recorded when paid.

Participant Loans Receivable

Loans receivable from participants are measured at their unpaid principal balance plus any accrued but unpaid interest. Delinquent participant loans are reclassified as distributions based upon the terms of the plan document.

Notes to Financial Statements

Contributions

Employee contributions are recorded when withheld from participants' pay. Employer contributions are recorded on a quarterly basis.

Use of Estimates

The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein, and disclosure of contingent assets and liabilities. Accordingly, actual results could differ from those estimates.

Basis of Presentation

The assets of the Plan are held in the Xerox Corporation Trust Agreement to Fund Retirement Plans (Master Trust). The value of the Plan's interest in the Master Trust is based on the beginning of year value of the Plan's interest in the trust, plus actual contributions and investment income (loss) based on participant account balances, less actual distributions and allocated administrative expenses. For financial reporting purposes, income on plan assets and any realized or unrealized gains or losses on such assets and expenses in the Master Trust are allocated to the Plan based on participant account balances.

The Master Trust holds assets for other Company-sponsored plans, some of which may be defined contribution plans and some defined benefit plans. Because the Plan's interest in the Master Trust is based on participant investment options, there are certain Master Trust investments in which the Plan does not invest.

Reclassifications

Certain reclassifications were made to the prior year financial statements to conform to current year presentation.

Valuation of Investments and Income Recognition

The Plan's investment in the Master Trust is recorded at an amount equal to the Plan's interest in the underlying investments of the Master Trust. Investments of the Master Trust are stated at fair value. Shares of registered investment company funds are valued at the net asset value as reported by the fund managers at year-end. Common and preferred stock are stated at fair value based on published market closing prices. Fixed income investments are valued on the basis of valuations furnished by Company-approved independent pricing services. These services determine valuations for normal institutional-size trading units of such securities using valuation models or matrix pricing, which incorporates yield and/or price with respect to bonds that are considered comparable in characteristics such as rating, interest rate and maturity date and quotations from security dealers to determine current value. If these valuations are deemed to be either not reliable or not readily available, the fair value will be determined in good faith by the Company. The fair value of the common collective trusts are valued at the net asset value on the last business day of the year. Limited partnerships including real estate trusts, are valued at estimated fair value based on fair value as reported in their audited financial statements, as well as information received from the investment advisor. Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date.

Administrative Expenses

Certain administrative expenses, such as Trustee, record keeping, and investment manager fees are paid by the Master Trust and are netted against Master Trust investment income (loss). Expenses paid by the Plan include legal and audit fees. Certain other administrative expenses are paid by the Company.

Notes to Financial Statements

Risks and Uncertainties

Investments are exposed to various risks, such as interest rate and market risk. Due to the level of risk associated with certain investments and the level of uncertainty related to changes in the value of investments, it is at least reasonably possible that the changes in values of investments in the near term could materially affect the amount reported in the statements of assets available for benefits and the statement of changes in assets available for benefits.

The Plan invests a portion of its assets in securities with contractual cash flows, such as asset backed securities, collateralized mortgage obligations and commercial mortgage backed securities. The value, liquidity, and related income of these securities are sensitive to changes in economic conditions, including real estate value, delinquencies and/or defaults, and may be adversely affected by shifts in the market's perception of the issuers, including the issuers' creditworthiness. Early repayment of principal on some mortgage – related securities may expose the Plan to a lower rate of return upon reinvestment of the principal.

The Plan also invests in foreign securities. Investing in foreign securities may include certain risks and considerations not typically associated with investing in U.S. securities, such as fluctuating currency values and changing local and regional economic, political and social conditions, which may result in greater market volatility. In addition, certain foreign securities may not be as liquid as U.S. securities.

3. Federal Income Taxes

The Internal Revenue Service has determined and informed the Company by a letter dated September 9, 2013, that the Plan and related Master Trust are designed in accordance with applicable sections of the Internal Revenue Code (IRC). The Plan has been amended since receiving the determination letter. The Plan administrator believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the Internal Revenue Service. The plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2013, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The plan administrator believes it is no longer subject to income tax examinations for years prior to 2010.

4. Master Trust

As discussed in Note 2, the plan participates in the Master Trust. The Trustee holds the Master Trust's investment assets, provides administrative functions for each of the plans participating in the Master Trust, and executes investment transactions as directed by participants.

Savings Plan of Xerox Corporation and the Xerographic Division, Rochester Regional Joint Board on Behalf of Itself and Other Regional Joint Boards

Notes to Financial Statements

The following Xerox employee benefit plans represent the following percentages in the net assets of the Master Trust, for the year ended December 31:

	<u>2013</u>	<u>2012</u>

Beginning of year	8,026,680
End of year	<u><u>\$7,623,827</u></u>

* Net transfers include employer contributions, employee contributions, benefit payments and other transfers.

Savings Plan of Xerox Corporation and the Xerographic Division, Rochester Regional Joint Board on Behalf of Itself and Other Regional Joint Boards

Notes to Financial Statements

Investment Strategy Fiduciary

The named fiduciary with respect to the overall investment strategy for the Master Trust investments, along with all other day to day fiduciary investment responsibilities, is the Xerox Retirement Investment Committee (XRIC). The Xerox Corporate Treasurer chairs the XRIC, which is composed of corporate members who oversee the management of the funds on a regular basis.

During 2013, the Master Trust's investments (including investments bought, sold, as well as held during the year) appreciated (depreciated) in value as follows (in thousands):

	Year Ended December 31, 2013
Fixed income investments	(169,968)
Registered investment companies	(20,202)
Common and preferred stock	435,407
Common collective trusts	437,217
Xerox common stock	87,076
Futures contracts	(2,967)
Foreign currency contracts	633
Options/Swaptions contracts	(33,949)
Interest in real estate trusts	6,818
Interest in partnerships/joint ventures	79,428
Swap contracts	(14,755)
Net appreciation	<u>\$ 804,738</u>

5. Fair Value Measurement

ASC 820, *Fair Value Measurements and Disclosures*, defines fair value, establishes a market-based framework hierarchy for measuring fair value, and expands disclosures about fair value measurements in the footnotes to the financial statements. ASC 820 is applicable whenever another accounting pronouncement requires or permits assets and liabilities to be measured at fair value.

In accordance with ASC 820, fair value is defined as the price that would be received to sell an asset in an orderly transaction between market participants at the measurement date in the principal or most advantageous market of the asset.

ASC 820 established a three-tier hierarchy based on transparency of inputs to the valuation of an asset or liability:

Level 1: Unadjusted quoted prices in active markets for identical, unrestricted assets or liabilities.

Level 2: Prices determined using other significant observable inputs. Observable inputs are inputs that other market participants would use in valuing a portfolio instrument. These may include quoted prices for similar securities, interest rates, foreign exchange rates, prepayment speeds, credit risk and others.

Savings Plan of Xerox Corporation and the Xerographic Division, Rochester Regional Joint Board on Behalf of Itself and Other Regional Joint Boards

Notes to Financial Statements

Level 3: Prices determined using significant unobservable inputs. In situations where quoted prices or observable inputs are unavailable (for example, when there is little or no market activity for an investment at the end of the period), unobservable inputs may be used. Unobservable inputs reflect the Plan Administrator's own assumptions about the factors market participants would use in valuing a portfolio instrument, and would be based on the best information available.

A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement.

The primary Level 3 assets are Real Estate and Private Equity/Venture Capital investments. The fair value of the real estate investment funds are based on the Net Asset Value (NAV) of the ownership interest in the funds. NAV information is received from the investment advisers and is primarily derived from third-party real estate appraisals for the properties owned. The fair value for the private equity/venture capital partnership investments are based on our share of the estimated fair values for the underlying investments held by these partnerships as reported in their audited financial statements. The valuation techniques and inputs for the Level 3 assets have been consistently applied for all periods presented. The investment advisers are selected by the XRIC. The authority for monitoring the valuation process of all investments is delegated by the XRIC to the Chief Investment Officer to whom the Xerox Trust Investment group reports. The Trust Investment group meets with investment advisers and performs quarterly reviews of the funds' fair value measurements with investment advisers comparing those valuations to similar funds' valuations outside of the Master Trust. Any changes in the fair value measurements are followed up and brought to the XRIC's attention at their quarterly meetings.

Level 3 Investment Assets

The level 3 investment assets represent approximately five percent of the total Master Trust investments and are comprised of the partnerships, real estate funds and investments in restricted stock. The table below sets forth a summary of changes in the fair value of the Master Trust's level 3 investment assets for the year ended December 31, 2013. The classification of an investment within level 3 is based upon the significance of the unobservable inputs to the overall fair value measurement.

Total	<u>\$3,724.9</u> **	<u>\$ 98.5</u>				

** Amount represents certain investments of the Master Trust that calculate net asset value per share.

¹ These categories represent investments in Common Collective Trusts investing in domestic equity, international equity, emerging markets and fixed income securities. All the Common Collective Trust funds have daily liquidity and are not subject to any redemption restrictions at the measurement date. The funds have different trading terms varying from one to three days.

² This category includes three partnership funds that invest in international equity. The funds allow for monthly redemptions and contributions on the first of each month. The fund manager must be notified by the 15th of the preceding month for redemptions and contributions.

³ This category includes 15 partnership funds that invest in private equity both domestically and internationally. These investments can never be redeemed during the life of the funds. Instead, distributions are received through the liquidation of the underlying assets of the funds. It is estimated that the underlying assets will be liquidated over the next 1 to 5 years. Unfunded commitments of \$94.0M remain in eight of the funds.

⁴ This category includes 15 investments in domestic and international real estate funds. The fair value of these investments is estimated using the NAV of the Trust's ownership interest in partners' capital. The valuation inputs of these investments are derived from third party appraisals. These investments can never be redeemed during the life of the funds. Distributions from each fund will be received as the underlying investments if the funds are liquidated over the next 1 to 6 years. Unfunded commitments of \$4.5M remain in seven of the funds.

Notes to Financial Statements

6. Derivative Policy

The Master Trust may enter into contractual arrangements (derivatives) in carrying out its investment strategy, and is limited to the use of derivatives allowed by the Investment Policy Statement, principally to: (1) hedge a portion of the Master Trust's portfolio to limit or minimize exposure to certain risks, (2) gain an exposure to a market more rapidly or less expensively than could be accomplished through the use of the cash markets, and (3) reduce the cost of structuring the portfolio or capture value disparities between financial instruments. The Master Trust may utilize both exchange traded investment instruments such as equity and fixed income futures and options on fixed income futures, forward currency contracts, interest rate swaps, credit default swaps (CDS), swaptions and options. When engaging in forward currency contracts and any other over-the-counter derivatives, there is exposure to credit risk in the event of non-performance by the counterparties to these transactions. The Master Trust manages this exposure through credit approvals and limited monitoring procedures. Procedures are in place to regularly monitor and report market and counterparty credit risks associated with these instruments. This counterparty risk is further mitigated through the netting provisions of various agreements with certain counterparties that permit net settlement under specific conditions and, for certain counterparties, by providing collateral. These netting provisions may be part of an International Swap and Derivative Association agreement (ISDA) or other types of agreements. Such netting provisions govern the ability to offset amounts the Master Trust owes a counterparty against amounts the counterparty owes the Master Trust (net settlement). The agreements are specific to an individual counterparty within a particular investment account and generally allow net settlement in the event of contract termination. Furthermore, these agreements generally permit termination by either party prior to maturity upon the occurrence of certain stated events, such as failure to pay or bankruptcy. In addition, ISDAs specify other events, the occurrence of which would allow one of the parties to terminate. Collateral requirements are determined based on the net aggregate unrealized gain or loss on all bilateral derivatives with each counterparty, subject to minimum transfer amounts. Any additional collateral required due to changes in securities values is transferred the next business day.

The Master Trust discloses all derivatives on the Statement of Net Assets of the Master Trust (Footnote 4) on a gross basis. All collateral amounts (pledged and received) for the individual types of derivatives are disclosed in the following footnotes.

During the years ended December 31, 2013 and 2012, derivatives were used only in the defined benefit plan of the Master Trust.

Savings Plan of Xerox Corporation and the Xerographic Division, Rochester Regional Joint Board on Behalf of Itself and Other Regional Joint Boards

Notes to Financial Statements

The following is a summary of the significant accounting policies associated with the Master Trust's use of derivatives.

Forward Foreign Currency Exchange Contracts

Forward currency contracts are generally utilized to hedge a portion of the currency exposure that results from the Master Trust's holdings of equity and fixed income securities denominated in foreign currencies.

Forward currency contracts are generally marked-to-market at the prevailing forward exchange rate of the underlying currencies and the difference between contract value and market value is recorded as unrealized appreciation (depreciation) in Master Trust net assets. When the forward currency contract is closed, the Master Trust transfers the unrealized appreciation (depreciation) to a realized gain (loss) equal to the change in the value of the forward exchange contract when it was opened and the value at the time it was closed or offset. Sales and purchases of forward currency contracts having the same settlement date and broker are offset and any gain (loss) is realized on the date of offset.

Certain risks may arise upon entering into a forward currency contract from the potential inability of counterparties to meet the terms of their contracts. Additionally, when utilizing forward currency contracts to hedge, the Master Trust gives up the opportunity to profit from favorable exchange rate movements during the term of the contract. As of December 31, 2013 and 2012, the value of currencies under forward currency contracts represents less than 1% of total investments. A summary of open forward currency contracts of the Master Trust at December 31, 2013 and 2012 is presented below (*in thousands*):

At December 31, 2013, the Master Trust had pledged cash collateral of \$30,000 to counterparties.

Future Contracts

The Master Trust used equity index and fixed income futures contracts to manage exposure to the market. Buying futures tends to increase the Master Trust's exposure to the underlying instrument. Selling futures tends to decrease the Master Trust's exposure to the underlying instrument held or hedge the fair value of other fund investments. The Master Trust does not employ leverage in its use of derivatives. Futures contracts are valued at the last settlement price at the end of each day on the exchange upon which they are traded. Upon entering into a futures contract, the Master Trust is required to deposit either in cash or securities an amount (initial margin) equal to a certain percentage of the nominal value of the contract. Pursuant to the futures contract, the Master Trust agrees to receive from, or pay to, the broker an amount of cash equal to the daily fluctuation in the value of the futures contract. Such receipts or payments are known as "variation margin" which are generally settled daily and are included in the unrealized gains (losses) on futures contracts. The Master Trust will record a variation margin receivable or payable in the Master Trust net assets for variation margins which have not yet been paid at the end of the year.

Futures contracts involve, to varying degrees, credit and market risks. The Master Trust enters into futures contracts on exchanges where the exchange acts as the counterparty to the transaction. Thus, credit risk on such transactions is limited to the failure of the exchange. The daily settlement on the futures contracts serves to greatly reduce credit risk. Losses in value may arise from changes in the value of the underlying instruments or if there is an illiquid secondary market for the contracts. In addition, there is the risk that there may not be an exact correlation between a futures contract and the underlying index or security. As of December 31, 2013 and 2012, the unrealized gain/loss of future contracts represents less than 1% of total investments.

As of December 31, 2013 and 2012, U.S. Government Securities with market value of \$600, 375 and \$266,724, respectively, and cash balances of \$983,000 and \$0, respectively were pledged to cover margin requirements for open futures contracts.

A summary of open fixed income futures of the Master Trust is presented below (in thousands), for the year ended:

	December 31, 2013			December 31, 2012

Notes to Financial Statements

Interest Rate and Credit Default Swaps and Swaptions

The Master Trust may invest in interest rate swap contracts. The Master Trust uses interest rate swap contracts to manage its exposure to interest rates. Interest rate swap contracts typically represent the exchange between the Master Trust and a counterparty of respective commitments to make variable rate and fixed rate payments with respect to a notional amount of principal. Such contracts have a term coincident with the maturity date of the Master Trust, with settlement scheduled for the termination date of the contract.

During the period that the swap contract is open, the contract is marked-to-market as the net amount due to or from the Master Trust in accordance with the terms of the contract based on the closing level of the relevant index or security and interest accrual through valuation date. Swaps are marked to market daily based upon values from third party vendors or quotations from market makers to the extent available and the change in value, if any, is recorded as an unrealized gain or loss on the Statement of Net Assets Available for Benefits. Periodic cash settlements on interest rate swaps are recorded as realized gains or losses. Interest rate swap contracts may include extended effective dates.

Entering into a swap contract involves, to varying degrees, elements of credit, market and/or interest rate risk in excess of the amounts reported in the Statement of Assets and Liabilities. Notional principal amounts are used to express the extent of involvement in the transactions, but are not delivered under the contracts. Accordingly, credit risk is limited to any amounts receivable from the counterparty. To reduce credit risk from potential counterparty default, the Master Trust enters into swap contracts with counterparties whose creditworthiness has been approved by the Company. The Master Trust bears the market risk arising from any change in index or security values or interest rates. Under certain circumstances, the Master Trust may be required to pledge collateral to or may receive collateral from swap counterparties.

Savings Plan of Xerox Corporation and the Xerographic Division, Rochester Regional Joint Board on Behalf of Itself and Other Regional Joint Boards

Notes to Financial Statements

CDS contracts are agreements in which one party pays fixed periodic payments to a counterparty in consideration for a guarantee from the counterparty to make a specific payment should a specified negative credit event(s) take place. The Master Trust entered into CDS contracts to hedge the Master Trust's exposure on a debt security that it owns or in lieu of selling such debt security.

As the purchaser of a CDS contract, the Master Trust purchases protection by paying a periodic interest rate on the notional amount to the counterparty. The interest amount is accrued daily as a component of unrealized appreciation (depreciation) and is recorded as a realized loss upon payment. If a credit event as specified in the contract occurs, the Master Trust may have the option either to deliver the reference obligation to the seller in exchange for a cash payment of its par amount, or to receive a net cash settlement equal to the par amount less an agreed-upon value of the reference obligation as of the date of the credit event. The difference between the value of the obligation or cash delivered and the notional amount received will be recorded as a realized gain (loss).

As the seller of a CDS contract, the Master Trust sells protection to a buyer and will generally receive a periodic interest rate on the notional amount. The interest amount is accrued daily as a component of unrealized appreciation (depreciation) and is recorded as a realized gain upon receipt of the payment. If a credit event as specified in the contract occurs, the Master Trust may either be required to accept the reference obligation from the buyer in exchange for a cash payment of its notional amount, or to pay the buyer a net cash settlement equal to the notional amount less an agreed-upon value of the reference obligation as of the date of the credit event. The difference between the value of the obligation or cash received and the notional amount paid will be recorded as a realized gain (loss). The maximum potential amount of undiscounted future payments the Master Trust could be required to make as the seller of protection under a CDS contract is equal to the notional amount of the reference obligation.

As a protection seller, the Master Trust bears the risk of loss from the credit events specified in the contract. Although specified events are contract specific, credit events are generally defined as bankruptcy, failure to pay, restructuring, obligation acceleration, obligation default, or repudiation/moratorium. For CDS contracts on credit indices, quoted market prices and resulting market values serve as an indicator of the current status of the payment/performance risk. Increasing market values, in absolute terms when compared to the notional amount of the swap, represent a deterioration of the reference entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the contract. CDS contracts are valued daily, and the change in value is recorded as unrealized appreciation (depreciation) until the termination of the swap, at which time a realized gain (loss) is recorded.

CDS contracts can involve greater risks than if a plan had invested in the reference obligation directly since, in addition to general market risks, CDS's are subject to counterparty credit risk, leverage risk, hedging risk, correlation risk and liquidity risk. The Master Trust will enter into CDS transactions only with counterparties that meet certain standards of creditworthiness.

At December 31, 2013, the Master Trust had pledged cash collateral of \$586,000 and Government Securities of \$923,034 to swap counterparties.

							\$ 127,400	\$(11,866)

The Master Trust may write or purchase interest rate swaption agreements which are options to enter into a pre-defined swap agreement by some specified date in the future. The writer of the swaption becomes a counterparty to the swap if the buyer exercises. The interest rate swaption agreement will specify whether the buyer of the swaption will be a fixed rate receiver or a fixed rate payer upon exercise. Options on swap contracts are considered over-the-counter financial derivative instruments that derive their value from underlying asset prices, indices, reference rates, and other inputs or a combination of these factors. These contracts are normally valued on the basis of broker dealer quotations or by pricing service providers.

In 2013, total premiums received was \$7,941,825.

At December 31, 2013, the Master Trust was in receipt of cash collateral of \$10,680,000 from the broker for swaptions.

Savings Plan of Xerox Corporation and the Xerographic Division, Rochester Regional Joint Board on Behalf of Itself and Other Regional Joint Boards

Notes to Financial Statements

In 2012, total premiums received was \$1,067,495.

At December 31, 2012, the Master Trust was in receipt of cash collateral of \$19,775,000 from the broker for swaptions.

Options Contracts

The Master Trust may purchase and sell put and call options on securities. The Master Trust uses options to manage against changes in the market value of the Master Trust's investments, mitigate exposure to fluctuations in currency values, or interest rates, or protect the Master Trust's unrealized gains. In addition, the Master Trust may use options to facilitate investment transactions by protecting the Master Trust against a change in the market price of the investment, enhance potential gains, or as a substitute for the purchase or sale of securities or currency.

Exchange-traded options are valued using the National Best Bid and Offer (NBBO) close price. If the NBBO close price is not available, the NBBO bid (for long positions) or NBBO Ask (for short positions) will be used to value the option contract. Options traded over-the-counter are valued using a broker quotation or an internal valuation using an options pricing model such as Black-Scholes.

When the Master Trust writes an option, the premium received is recorded as a liability and is subsequently adjusted to the current fair value of the option written. Premiums received from writing options that expire unexercised are treated by the Master Trust on the expiration date as realized gains from written options. The difference between the premium and the amount paid for a closing purchase, including brokerage commissions, is also recorded as a realized gain / (loss). When an instrument is purchased or sold through an exercise of an option, the related premium paid (or received) is added to (or deducted from) the basis of an instrument acquired or deducted from (or added to) the proceeds of the instrument sold.

Writing puts and buying calls may increase the Master Trust's exposure to changes in the value of the underlying instrument. Buying puts and writing calls may decrease the Master Trust's exposure to such changes. Losses may arise when buying and selling options if there is an illiquid secondary market for the options, which may cause a party to receive less than would be received in a liquid market, or if the counterparties do not perform under the term of the options.

There were no purchased or written options outstanding as of December 31, 2013.

Savings Plan of Xerox Corporation and the Xerographic Division, Rochester Regional Joint Board on Behalf of Itself and Other Regional Joint Boards

Notes to Financial Statements

Below is the summary of the purchased and written options contracts outstanding as of December 31, 2012 (*in thousands*):.

Purchased options

The average notional value of interest rate swap contracts was \$171,536,421 and the average notional value of CDS contracts was \$40,087,408. The average notional value of forward foreign currency exchange contracts was \$247,132,174.

7. Securities Lending

The Master Trust is not restricted from lending securities to other qualified financial institutions, provided such loans are callable at any time and are at all times fully collateralized by cash (including both U.S. and foreign currency), cash equivalents or securities issued or guaranteed by the U.S. government or its agencies and the sovereign debt of foreign countries. The portfolios may bear the risk of delay in recovery of, or even of rights in, the securities loaned should the borrower of the securities fail financially. Consequently, loans of portfolio securities will only be made to firms deemed by the sub advisors to be creditworthy. The portfolios receive compensation for lending their securities either in the form of fees or by retaining a portion of interest on the investment of any cash received as collateral. Cash collateral, if any, is invested in the State Street Quality A Short Term Investment Fund. There were no securities loaned by Master Trust at December 31, 2013.

8. Related Party Transactions

The Plan, along with the Xerox Corporation Savings Plan, invest in a unitized stock fund, The Xerox Stock Fund (the Fund), which is primarily comprised of Xerox Corporation common shares. The unit values of the Fund are recorded and maintained by the Trustee. During the year ended December 31, 2013, the Plans purchased common shares in the Fund in the approximate amount of \$13,218,000, sold common shares in the Fund in the approximate amount of \$37,017,000, and had net appreciation in the Fund of approximately \$65,667,000. The total value of the Plans' investment in the Fund was approximately \$134,859,000 and \$92,991,000 at December 31, 2013 and 2012, respectively. During 2013, dividends paid on Xerox Corporation common shares amounted to \$2,707,000. These transactions, as well as participant loans, qualify as party-in-interest transactions. Furthermore, the Plan pays administrative expenses related to salaries of Xerox employees responsible for plan administration. In addition, certain funds are managed by an affiliate of the Trustee and the investment manager and therefore, qualify as party-in-interest transactions. The Plan also accepts rollovers from affiliated plan, the Retirement Income Guarantee Plan of Xerox Corporation and the Xerographic Division, Rochester Regional Joint Board on Behalf of Itself and Other Regional Joint Boards (RIGP – Union Plan) and these transactions qualify as party-in-interest. During the year ended December 31, 2013 there was one transfer of \$124,000 from the Plan to the Xerox Corporation Savings Plan.

9. Commitments and Contingencies

In the normal course of business, the Plan enters into agreements that contain a variety of representations and warranties which provide general indemnifications. The Plan's maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Plan that have not yet occurred. However, based on experience, the Plan expects the risk of loss to be remote.

The Master Trust is committed to invest \$913,190,602 in certain private equity and real estate funds, of which \$814,751,724 has been contributed as of December 31, 2013.

10. Litigation

Carlson v. Xerox Corporation, et al.

The Plan is a member of the plaintiff class in a consolidated securities law action (consisting of 21 cases) that was pending in the United States District Court for the District of Connecticut against the Company, KPMG and Paul A. Allaire, G. Richard Thoman, Anne M. Mulcahy, Barry D. Romeril, Gregory Tayler and Philip Fishbach. Plaintiffs purported to bring this case as a class action on behalf of a class consisting of all persons and/or entities, including the Plan, who purchased Xerox common stock and/or bonds during the period between February 17, 1998 through June 28, 2002 and who were purportedly damaged thereby (Class). Two claims were asserted: one alleging that each of the Company, KPMG, and the individual defendants violated Section 10(b) of the 1934 Act and

Savings Plan of Xerox Corporation and the Xerographic Division, Rochester Regional Joint Board on Behalf of Itself and Other Regional Joint Boards

Notes to Financial Statements

SEC Rule 10b-5 there under; and the other alleging that the individual defendants are also liable as “controlling persons” of the Company pursuant to Section 20(a) of the 1934 Act. On January 15, 2009, the Court entered an order and final judgment approving the settlement, awarding attorneys’ fees and expenses, and dismissing the action with prejudice.

In December, 2009, the Master Trust received \$29.4 million relating to its portion of the settlement to be allocated between the participating plans in the Master Trust. The distribution of the settlement was completed in January, 2010.

On February 29, 2012, lead plaintiffs filed an unopposed motion seeking the Court’s approval for a re-distribution of residual class settlement funds, less costs of administration. On September 27, 2012, the Court issued an order permitting the plaintiffs to re-distribute the residual amount remaining in the settlement fund. In December 2012 the Master Trust received \$40,515 relating to its portion of the residual amount.

11. Subsequent Events

The Plan has evaluated subsequent events through the time of filing this Form 11-K with the Securities and Exchange Commission.
